Name 2 jobs that require problem solving skills.

Name 1 job that would require you to work as part of a team.

Name 2 jobs in the science industry.

Name 3 types of engineers.

Name 2 jobs that would require maths.

Pick one of the jobs you've written above and research what skills they would need. List them here.

Pick a different job you've written down and research what education is needed for this career. Does it need a degree? Can you do an apprenticeship?

What is the difference between a degree and a degree apprenticeship?

Find 3 colleges or universities in the region where you can study an apprenticeship or a degree apprenticeship.

Look at the higher education institutes listed below. For each university, write down one undergraduate degree available to study there.

Durham University

Newcastle University

Teesside University

Northumbria University

University of Sunderland

Pick one of the above degrees and find out what subjects and grades you need to get onto that particular course.

What careers can you do with that particular degree?

Pick one of the universities listed above and find a course that interests you. Write it down and explain why you've chosen it.

What careers can you do with that particular degree? List at least 3.

Find 1 job in each of the following sectors:

Life sciences

Construction

Banking

Manufacturing

Energy

Find a company in the North East of England that works in each of the above sector and write down what they do.
