REQUIRED QUALIFICATIONS

After GCSE's, you'd need to start choosing educational options specifically for technology. You can complete a level 3 apprenticeship in a technology discipline, or you can go down the A level route and take some science/technology based A levels. After either of these routes, you can head straight into work with an employer, or you can go onto higher education at one of the incredible institutes in the region and complete a degree or a degree apprenticeship!

REGIONAL EDUCATIONAL INSTITUTES

Regional universities provide amazing degree courses in a huge variety of technology disciplines! But if university isn't the place for you, perhaps one of the regional colleges and their degree apprenticeship courses is more suitable! They too offer fantastic courses at higher levels in technology.
