

# SECTORS IN SCIENCE

## MEDICINE, HEALTH AND LIFE SCIENCES

From 'bench to bedside', there are many possible careers in this incredible industry. If you want to use your skills to develop and improve health and social care, this could be the industry for you!

## CAREERS

- Doctor
- Nurse
- Paramedic
- Clinical Scientist
- Physiotherapist
- Bioinformatician
- Biotechnician
- Clinical Engineer
- Medical Device Engineer

## ENVIRONMENT AND AGRICULTURE

Many scientists are working to find innovative solutions to global environmental issues, such as those caused by global warming and conserving species. If you have a passion for the environment, this could be an industry you thrive in!

## CAREERS

- 
- Zoologist
  - Geotechnical Engineer
  - Ecologist
  - Hydrologist
  - Environmental Consultant
  - Environmental Engineer
  - Soil Engineer
  - Horticulturalist
  - Water Qualities Specialist

## ENERGY

Renewable energy and reducing the carbon footprint is highly important to ensure we live in a safe and sustainable world. Scientists all over the globe are working on this, and there are new developments constantly happening! There is a career for everyone in this thriving sector!

## CAREERS

- Control Systems Engineer
- Safety Engineer
- Energy Analyst
- Sustainability Consultant
- Nuclear Engineer
- Wind Service Technician
- Energy Manager
- Wind Energy Consultant
- Piping Designer
